

STAYING AHEAD IN AN AGE OF ABUNDANT INTELLIGENCE

Abundance Capability as a Strategic Necessity.

THE 10 CAPABILITIES FOR ABUNDANCE

THE PARADOX & THE QUESTION

1. THE GREAT UNBUNDLING OF WORK

- Jobs are fragmenting into tasks & outcomes
- Careers are portfolios, not ladders
- Define by outcomes, not titles
- Adaptability is key

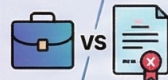

2. AI ARBITRAGE: CAPABILITY VS ADOPTION

- Capability advancing exponentially, adoption lagging
- Redesign workflows for massive gains
- Treat AI as infrastructure, not novelty
- Behavioural shift required

3. THE NEW LITERACY STACK

- Asking better questions
- Breaking problems down
- Verifying outputs & synthesising
- Communicating clearly (model-agnostic skills)
- Amplify analytical & systems thinking with AI

4. OUTPUT OVER CREDENTIALS

- Credentials inflating, signals weakening
- Proof-of-work is the new currency
- Make work visible (portfolios, demonstrations)
- What you have built & shipped matters most

5. A PERSONAL AI OPERATING SYSTEM

- Use AI systemically, not episodically
- Build repeatable loops for thinking, creating, deciding, executing
- Automate routine tasks for strategic time
- Focus on systems, not just tools

6. JUDGMENT UNDER ABUNDANCE

- Attention is the bottleneck with infinite data
- Judgment is scarce (knowing what matters/to ignore)
- Understanding second-order effects
- Decision quality over data access

7. CREATIVITY AS ECONOMIC ADVANTAGE

- AI generates, humans choose
- Connecting domains, reframing problems
- Creative thinking among fastest-growing skills
- Originality is how differentiation survives

8. COLLABORATION AND SOCIAL INTELLIGENCE

- AI raises premium on human coordination
- Trust, communication, leadership matter more
- Combine AI leverage with strong social intelligence
- Capability is collective

9. DIGITAL FLUENCY AS A CIVIC SKILL

- Digital skills are civic, not just occupational
- Affects employability, participation, trust
- Comfort, curiosity, and adaptability are essential
- Closing the gap is about confidence

10. ENTREPRENEURSHIP AS DEFAULT MODE

- A stance, not a career choice
- Experiment, take ownership, solve problems without permission
- Agency is the differentiator in all sectors
